Commissioner of Patents and Trademarks  
Washington, DC 20231

January 30, 2003

Dear Commissioner.

The above named party is hereby requesting that the Process to Prevent Fracture of Endodontically Treated Teeth During Post Placement in the restoration of human teeth be covered under the Utility patent Program offered by the US Patents and Trademark Office. Enclosed please find a check covering the fee, documents introducing the patentable process for connecting coronal replacement material to the remaining root structure of endodontically treated human teeth in a stress free manner and an 8.5"x11" drawing entitled " Sleeve and Post System showing the specifications of items described.

Sincerely,

Jeff Ketzler
